Year 2018

1. Awareness on Rabies, Dengue & Malaria (Aug 23rd)

SMT.NPS GOVERNMENT DEGREE COLLEGE(W)

CHITTOOR-517 002, ANDHRA PRADESH.

DEPARTMENT OF MICROBIOLOGY

Date of event	23-08-2018
Name and type of event	Awareness on Rabies, Dengue & Malaria
Number of participants	I, II, III B.SC, I M.Sc.
Name & Address of the resource person / Program coordinator	College campus

Introduction:

The Department of Microbiology Adopted the village ootacheruvu for the development of the village in many spheres as such conducted various programmes, one among them is Awareness on RABIES, DENGUE AND MALARIA.

Awareness was created on the First aid to be done on the bite of rabid dog, immediate treatment for Rabid dog bite, vaccination of pet animals, encatchment of Rabid dog in their locality with the help of Municipal staff. Both Faculty and students through posters the themes of the programme were highlighted with poster presentations.

The rainy season is the hotspot for the multiplication of mosquitoes which are the transmitters of so many mosquito borne microbial diseases like Dengue, chicken guinea, Malaria hence the activity was conducted to create awareness among people of Ootacheruvu village staff and students actively participated in the activity by knowing their preliminary knowledge on Mosquito borne diseases. Awareness was created on types of mosquitoes mode of transmission, sources of mosquitoes, Diseases caused by mosquitoes, early symptoms caused by Mosquito borne diseases.

OBJECTIVES:

1. To aware on rabies and dengue
2. Interact with people and discussed about the clinical diseases, symptoms and precautions to overcome the disease caused by rabies and dengue virus.

ACTIVITY REPORT:

AWARENESS PROGRAMME ON RABIES IN ADOPTED VILLAGE OOTACHERU

The Department of Microbiology in the college adopted the village ootacheruvu and conduct various awareness programmes on Health and Hygiene, Diseases, Uses of Hand washing. On the occasion of Rabies Day September 28, the students of Microbiology through posters described to villagers the first aid and precautions to be taken on the rabid dog bite.

OUT COMES:

1. Participants were aware of mode of transmission of rabies and dengue disease.
2. Participants were aware of symptoms and precautions to overcome the disease Caused by rabies and dengue virus.
3. Participants were aware of rabies vaccination and mosquito killing methods.

Name and type of event	National level Rangoli competition on Microbiology and Immunology.
Number of participants	I, II, III B.SC, I M.Sc.
Name & Address of the resource person / Program coordinator	College campus

Introduction

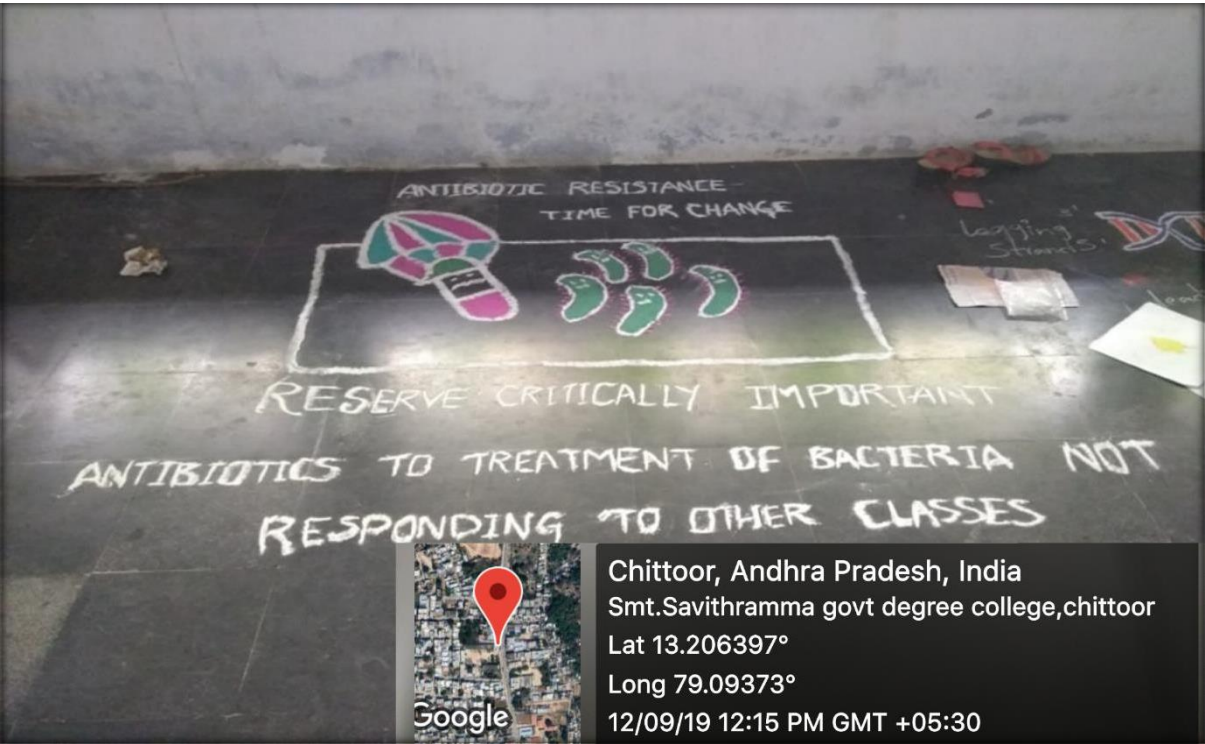

The Department of Microbiology in collaboration with MSI Microbiology society of India participated in National level Rangoli competition on Immunology with the theme “EFFECTS ANTIBIOTIC MISUSE”. College level rangoli competitions were organized to sensitize students and staff on the misuse of Antibiotics. Antibiotic resistance has become one of the greatest public health challenges of our time. Every year nearly 7 lakh people die because of infections that had become untreatable with antibiotics. So, the Microbiology students of both UG and PG through their rangoli gave a message to reduce unwanted usage of antibiotics and to use antibiotics only with the prescription of a doctor. The best entries were sent to MSI through Gmail and appreciation certificates for college and students were received.

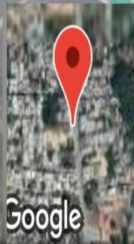

The slogans given by students

“HANDLE ANTIBIOTICS WITH CARE”

“SAVE THE MEDICINE THAT SAVES US”

5. An awareness program on “RABIES” (Sep 28th)

SMT.NPS GOVERNMENT DEGREE COLLEGE(W)

CHITTOOR-517 002, ANDHRA PRADESH.

DEPARTMENT OF MICROBIOLOGY

Date of event	28-09-2019
Name and type of event	An awareness programme on “RABIES”
Number of participants	64
Name & Address of the resource person / Program coordinator	Department of Microbiology & Oota Chervu

Introduction

September 28 is World Rabies Day. Established in 2007, World Rabies Day aims to raise awareness about the world’s deadliest infectious disease and help the world come together to fight the disease. Awareness of rabies disease engages communities and empowers people to save themselves by seeking the care they need. This includes an understanding of how to prevent rabies in animals, when to suspect rabies, and what to do in case of a bite.

Objectives

1. This program aims to prevent and control rabies infection by providing and promoting accessible vaccines, along with rabies education and awareness

12.Free Dental health check-up (Jun 25th)

SMT.NPS GOVERNMENT DEGREE COLLEGE(W)

(Affiliated to S.V. University)

Reaccredited by NAAC with 'B'

Greampet, Vellore Road, CHITTOOR-517 002, ANDHRA PRADESH.

Date of event	25-06-2022
Name and type of event	Free Dental health check up
Number of participants	68
Name & Address of the resource person / Program coordinator	Department of Microbiology & HariPriya dental health, Chittoor.

Introduction

A healthy mouth can be a great asset. Our teeth have such an important role to play in our lives. They help us chew and digest food, they help us to talk and speak clearly and they also give our face its shape. A smile also has other day-to-day benefits. It can give us greater confidence, as well as influence our social lives, careers and relationships. Because of this, it only makes sense to give our oral health the best care possible. A free dental camp was organised by the department of Microbiology to create awareness about dental health in association with Haripriya Dental Hospital Chittoor .Dr Ravi.M enlightened the public and students about dental care .50 people in and around Chittoor participated in

the programme and got checked their teeth .Around 180 students got tested their teeth .Dr Ravi M. Demonstrated the tooth brushing method and types of brushes choose for brushing .

Objectives

- To Aware the Students and public about the importance of Dental care in maintaining good health
- To inspire the people to brush daily twice
- To Aware the Students, how to choose good tooth paste and tooth brushes

Photos

13. Blood Group Testing and Awareness Program (Jul 22nd)

Location

SMT.NPS GOVERNMENT DEGREE COLLEGE(W)

CHITTOOR-517 002, ANDHRA PRADESH.

DEPARTMENT OF MICROBIOLOGY

Date of event	19-4-2022 ??
Name and type of event	Blood grouping at Ootachervu adopted village, Chittoor
Number of participants	??
Name & Address of the resource person / Program coordinator	Dr.K.Ushasri, Assistant Professor, Department of Microbiology NPS Govt (W),College, Chittoor

Introduction

The aim of the programme is to create understanding about knowing the importance of One's Own blood grouping. The most important reason to know your blood type is in case of an emergency. If you are in a situation where you require a blood transfusion, you'll need compatible blood. An incompatible blood group can cause blood cells to clump—which can be fatal. One of the best, and most selfless, reasons to know your blood type is to help others through blood donations. Medical facilities are always in need of blood donations, whether you are O or A.

Objectives

- To Aware the Public about the importance of Blood groups
- To inspire the people to test their blood groups
- To Aware the Students, to become the Blood Donors during emergency

Activity Report

The Students of the department conducted Blood grouping test. Villagers of are not aware of their own blood group were tested and given blood grouping card. Around 34 people got teste their blood groups and awareness were created about the importance of Blood group. Students got hand on experience and lab to land experience.

Photos

14.Observation of “World Hepatitis day” (Jul 28th)

Date of event	28-7-2022
Name and type of event	Observation of “World Hepatitis day” -2022 Online Quiz program on Hepatitis
Number of participants	100
Name & Address of the resource person / Program coordinator	Dr.K.Ushasri, Assistant Professor, Department of Microbiology NPS Govt (W),College, Chittoor

Introduction

World Hepatitis Day, 28 July, is an opportunity to step up national and international efforts on hepatitis, encourage actions and engagement by individuals, partners and the public and

highlight the need for a greater global response. The date of 28 July was chosen because it is the birthday of Nobel-prize winning scientist Dr Baruch Blumberg, who discovered hepatitis B virus (HBV) and developed a diagnostic test and vaccine for the virus. This new outbreak brings focus on thousands of acute viral hepatitis infections that occur among children, adolescents and adults every year. Most acute hepatitis infections cause mild disease and even go undetected. Global efforts prioritize the elimination of the hepatitis infections B, C and D infections. Unlike acute viral hepatitis, these 3 infections cause chronic hepatitis that lasts for several decades and culminate in over 1 million deaths per year from cirrhosis and liver cancer. These 3 types of chronic hepatitis infections are responsible for over 95% of hepatitis deaths. While we have the guidance and tools to diagnose, treat, and prevent chronic viral hepatitis, these services are often out of reach of communities and are sometimes only available at centralized/specialized hospitals. On World Hepatitis Day 2022, WHO is highlighting the need for bringing hepatitis care closer to the primary health facilities and communities so that people have better access to treatment and care, no matter what type of hepatitis they may have.

Objectives

1. To create awareness on hepatitis among the people
2. To understand the Vaccines for hepatitis prevention

Activity Report

The Department of Microbiology and Zoology organized “World Hepatitis Day on 28 July, to raise awareness of viral hepatitis among the Public, students and staff. Invited the neighborhood college students to take part in online quiz to create awareness on hepatitis. The world is currently facing a new outbreak of unexplained acute hepatitis infections affecting children. WHO, together with scientists and policymakers in affected countries, are working to understand the cause of this infection that does not appear to belong to any of the known 5 types of hepatitis viruses: A, B, C, D, and E. Principal Dr Manohar Addressed the gathering and briefed about the history of Hepatitis. Sri R. Anand, HOD of Zoology spoke on Statistical Data of Hepatitis. K.Ushasri HOD of Microbiology stressed the preventive measures, Smt N. Sravani, Lecturer of Microbiology Explained the mode of transmission.

An Online quiz is Conducted on this occasion. students enthusiastically took the quiz and shared their experience All the participants actively participated in the interaction session. I, II Prizes were distributed to the winners.

Photos

Dr.K. Manohar Principal addressing the gathering.

Online QUIZ - I Prize winner Ms A. Dileep Rani, II B.Sc. (MZC)

Online Quiz - II Prize Winner Ms M. Sharoon Priyadarshini, II B.Sc (MZC)

Outcomes

1. Participants were aware of Hepatitis Diseases
2. Participants tested their awareness on hepatitis by participating in Online quiz.

15.Observation of “World Ozone Day “ (Sep 16th)

Location

SMT.NPS GOVERNMENT DEGREE COLLEGE(W)

(Affiliated to S.V.University)

Reaccredited by NAAC with ‘B’

Greampet, Vellore Road, CHITTOOR-517 002, ANDHRA PRADESH.

Date of event	16-09-2022
Name and type of event	Observation of “World Ozone Day “ Poster presentation
Number of participants	49
Name & Address of the resource person / Program coordinator	Department of Microbiology & Municipal High School, Chittoor

Introduction

Objectives

- To Aware the Students to know the importance of World Ozone day to discuss Some of Applications are involve World Ozone day in our real life.
- To inspire the people to become World Ozone day
- To Aware the Students, how to protect ozone layer by the harmful ultraviolet (UV) radiations.

Activity Report

The Aim of the Programme is to create environmental consciousness among the high school students about the Significance of Ozone in the atmosphere. In collaboration with Municipal High school, Chittoor. The programme was arranged with Poster presentations and conducted Rapid fire questions on Ozone layer. All the students were participated in the programme and won prizes.
